

FDE Enclosure Series

Optical Splicing and Distribution Enclosure

The **FDE Enclosure** is designed specifically for Fibre Optic Splicing and provides organization, splicing and security for your FTTx, broadband, distribution and building entrance applications. With the ability of installing the FDE in an enclosure, pedestal or standalone makes this a very versatile piece of equipment in your network. Designed specifically to better withstand environmental conditions, Inventronics' specialized CORR II process ensures that each enclosure is durably constructed and finished with an exceptional quality polyester powder coating. Each enclosure is constructed of .064 Aluminum and incorporates Inventronics' CORR II process to make each cabinet look great and last longer.

Removable Bulkhead Panel

Standard Entry System

Features
